

Curriculum Vision:

To nurture and develop curious, compassionate and knowledgeable learners through an experience-led, text-based and enquiry-driven curriculum, tailored to the needs of our children. Each subject has its own specific vision that runs through every unit-of-work from Nursery to Year 6

Curriculum Intent

Our broad, balanced and diverse curriculum has four intentions:

Intention 1: Knowledge

We intend that our pupils learn and remember all of the substantive and disciplinary powerful knowledge that is intended in the National Curriculum, alongside the values and cultural capital that will enrich their lives and help them to become responsible, aspirational and knowledgeable citizens. Subjects and units of work are interconnected and sequenced logically to allow for maximum knowledge retention.

Intention 2: Wellbeing

We intend that our pupils know how to look after their physical and mental wellbeing, whilst nurturing and being caring towards others.

Intention 3: Text-rich learning

We intend that our pupils become fluent and effective readers, developing a love of reading along the way.

Reading takes a central place allowing children to access all areas of our curriculum to further their understanding and knowledge, as well as enhancing their enjoyment of each subject.

Intention 4: Curiosity through experiences

We intend for our pupils to be globally curious and aware, appreciating the rich diversity of humanity through enriching experiences that expand their horizons.
